## EDUCATION

### Software Engineering

Amman Arab University

Amman

### Information Technologies

University of Sarajevo

Sarajevo

## PERSONAL PROJECTS

### plamen social media web application

- Social media web application with features like chats and group chats, posts, stories, communities etc.
- **Front-end** - React, Apollo
- **Back-end** - Node, Express, GraphQL
- **Database** - MySQL
- I've been working on this project for a couple of months and I put a lot of effort into it. It was very challenging project and I got a lot of knowledge while working on it.
- **Website**: <https://plamen-main.herokuapp.com>
- **Github**: <https://github.com/demac44/plamen>

### plamen mobile application

- Mobile application for the plamen social media.
- This application is made using React Native on the front-end and same back-end as the web application.
- **Github**: <https://github.com/demac44/plamen-native>

### visitBiH

- Website for exploring and learning about beautiful country of Bosnia and Herzegovina.
- **Front-end** - React
- **Back-end** - Node, Express
- **Database** - MongoDB
- **Website** - [www.visitbosna.com](http://www.visitbosna.com)

## WORK EXPERIENCE

### Full-stack web developer

Freelance

2019 - Present

## SKILLS

NodeJS

Javascript

React
