

Umejr Demir

Software Developer

I'm a software developer and a student of Software Engineering. I have been a developer for more than 2 years. My primary field is full-stack web development, but I'm also familiar and still learning machine learning and data science.

PERSONAL PROJECTS

plamen social media web application (2021 - Present)

- Social media web application with features like chats and group chats, posts, stories, communities etc.
- I've been working on this project for a couple of months and I put a lot of effort into it. It was very challenging project and I got a lot of knowledge while working on it.
- **Front-end** - React, Apollo
- **Back-end** - Node, Express, GraphQL
- **Database** - MySQL
- **Link for this project (development version):**
- <https://plamen-main.herokuapp.com>

plamen mobile application (2022 - Present)

- Mobile application for the plamen social media.
- This application is made using React Native on the front-end and is using same back-end as web application.
- Link for the development version of application will be available soon.

visitBiH (2019 - 2020)

- Website for exploring and learning about my country Bosnia and Herzegovina.
- This is my first bigger project. I put a lot of effort into it, but also made a lot of mistakes during development, which helped me and taught me and introduced me to best practices in development.
- **Front-end** - React
- **Back-end** - Node, Express, RESTful API
- **Database** - MongoDB
- **Link for the application:** <https://visitbih.herokuapp.com>

WORK EXPERIENCE

Full-stack web developer

Freelance

2021 - Present

SKILLS

NodeJS

Javascript
