PROJECTS

plamen social media web and mobile platform

- Social media web application with advanced features like individual and group chats, posts, stories, participating in different communities etc. I worked on this project for three months and put a lot of effort into it. It was very challenging project and I got a lot of valuable knowledge and skills while working on it.
- **Front-end** - React, React Native, Apollo
- **Back-end** - NodeJS, Express, GraphQL
- **Database** - MySQL
- **Web platform:** <https://github.com/demac44/plamen>
- **Mobile platform:** <https://github.com/demac44/plamen-native>

VisitBiH web and mobile platform

- For this project I built a website, mobile app and an API with 200+ places to see and explore in Bosnia and Herzegovina and a number of articles to read about it. Mobile app will soon be available on Google Play Store.
- **Front-end** - React
- **Back-end** - Node, Express
- **Database** - MongoDB
- **Website** - www.visitbosna.com
