PROJECTS

VisitBiH web and mobile app (2022)
- Web and mobile application for exploring and reading about Bosnia and Herzegovina.
- For this project I built an **API** with 200+ places to see and visit in BiH using **NodeJS and Express** on the back-end, **MongoDB** for database and **Redis** for caching data.
- Front-end is built with **React** and mobile app with **Flutter.**
- Mobile app will soon be available on **Google Apps**.
- **WEBSITE**

Social media web and mobile platform (08/2021 - 12/2021)
- Web and mobile application with many advanced features like individual and group chats, stories, different posts, notifications etc.
- Back-end is built with **NodeJS and Express**, together with **GraphQL** for handling data coming from **MySQL** database and **real-time** messages and notifications.
- On the front-end, technologies are **React** and **Apollo** for handling GraphQL queries.
- Mobile app is built with **React Native** and **Apollo**.
- **GITHUB WEB APP | GITHUB MOBILE APP | WEBSITE**

photosFromBosnia (2022)
- Web application for searching and downloading images from Bosnia and Herzegovina.
- The application is built using **Next.js** with **Typescript** and **Sass**.
- **Firestore** is used as database for this application.
- **WEBSITE | GITHUB**

SKILLS

Node.js   Next.js   Typescript   Python   PHP

React   Angular   React Native   Flutter

GraphQL   Apollo   REST API   SQL

MongoDB   Redis   Firebase   HTML   CSS

Javascript   Sass   jQuery
